Google Rating	4.7	4.7
Review Count	56 reviews	315 reviews
Phone Experience	43/100	94/100
Search Visibility	Inconsistent	Visible
First Impression	Basic	Strong
Found on AI Search	Not showing up	Shows up

* Them = Get Well Clinic Family Health and Weight Loss

Get Well Clinic is showing up in places you aren't yet — every search where they appear and you don't is a client choosing them by default. That's your room for growth.

WHAT WE FOUND

Search engines and AI tools can't confirm your business serves this area — when someone nearby searches for what you offer, you're not in the conversation

Your site takes too long to load on phones (43/100). Visitors are leaving your site before it even opens.

Your review profile isn't being leveraged to its full potential — how reviews are structured, responded to, and distributed across platforms directly affects how search engines and AI tools rank your business against competitors

You don't show up when potential clients search for your services using AI — these tools look for businesses with clear location signals, consistent citations, and content structured around how people actually search. This is a new and emerging way to search.

AI search doesn't work like Google — keywords are only part of the equation.

These engines read your entire web presence: structured data, citations, and content that directly answers what people are actually searching for.

Your next client is already out there searching. Make sure you're the one they find.
